

EARLYBIRD OCTOBER 2011

Monthly performance indicators for retirement fund investors also available at www.rfsol.com.na.

This short newsletter is intended to give retirement fund investors early indicators of performances of retirement fund portfolios.

Comments and suggestions are welcome.

The information provided in the graphs below is obtained from the Sharenet website.

Note: Unit trust performances are derived at by simply dividing closing unit price by opening unit price. Because there are different methods for calculating unit prices, year-to-date performance in some cases excludes dividend distributions and in others include dividend distributions.

To that extent year to date returns are distorted in those cases where the unit price does not include dividends. Over shorter periods, dividend distributions can have a significant impact on year-to-date returns, more specifically in case of high income funds.
