

EARLYBIRD NOVEMBER 2013

Monthly performance indicators for retirement fund investors also available at www.rfsol.com.na.

This short newsletter is intended to give investors early indicators of performances of retirement fund portfolios.

Comments and suggestions are welcome.

The information provided in the graphs below is obtained from the Sharenet website. Note that information in respect of certain Namibian unit trusts is currently not updated by Sharenet.

Note: Unit trust performances are derived at by simply dividing closing unit price by opening unit price. Because there are different methods for calculating unit prices performance in some cases excludes dividend distributions and in others include dividend distributions.

To that extent year to date returns are distorted in those cases where the unit price does not include dividends. Over shorter periods, dividend distributions can have a significant impact on year-to-date returns, more specifically in case of high income funds.
